Small Town Emergency Disaster & Communications Mobile App.

- ✓ Having the ability to communicate with your community immediately during an emergency not only save lives but brings everyone closer together.
- ✓ Having the ability to manage your communications with your mobile devices adds valuable time during an emergency disaster.
- ✓ Having the ability to utilize additional resources like sending video, audio and images to residents during an emergency enhances the importance of the local mobile communication experience.
- ✓ Test messaging, email and phone calls are antiquated technology! Why, is simple SPAM! With MUM there is no SPAM only important messages. And with our emergency "TAKE NOTICE" sound you'll be able to know its emergency time.
- ✓ MUM is secure, private and immediately delivered no matter where you are - across town to across the country.
- ✓ MUM is designed and priced right for smaller municipalities.

✓ **ALL THIS FOR LESS THAN 3 CENTS per resident per month!**

Completely Mobile and locally managed in the cloud. Get 24/7/365 access wherever you are. Works with desktops,, laptops and most smart devices

Imagine sending out video, images and hyperlinks of local TV and Radio station to inform residents live and immediately!

Emergency Services

Share emergency responsibilities with your Fire, Police Road, Water and other departments to get the word out quicker.

Having the ability to announce road closures, impending inclement weather, floods, Haz-Mat, tornados, etc. will save lives and comfort the community.

City Hall

Send out important information to residents like meeting and election results. Stream live video for those not able to attend the meeting.

School System

School emergencies and other important information can be delivered directly to school staff and/or community within seconds. Delay, closures and emergency notifications are just a few keystrokes on most devices wherever you are.

Local Business

MUM can and should be made available to every establishment in your community whether it's an employer, church, restaurant, etc. because it will provide a secure network for them while they are part of yours. If business want to help support you with a donation you can have their name, logo, link and phone displayed on EVERYONE's smart device. They get the tax advantage, the soft marketing approach and benefit of all the good will it generates.
